

# INFO ICT DISEMBER 2017

## Google Drive

### ◆◆◆ say hello to Backup & Sync/Drive File Stream

This is a merely **replacement of application**, not a termination of service

Google now has two fairly new software tools for backing up data and/or accessing files in the cloud which are; **Back up & Sync** and **Drive File Stream**. The major difference between Backup and Sync and Drive File Stream is the latter's ability to stream files from the cloud without actually storing them on the PC

Previously uploaded documents/files will **NOT BE AFFECTED**

Please **upgrade right now** to avoid any inconveniences, before **DECEMBER 11, 2017**

The current Google Drive app will simply **stop working** entirely on **MARCH 12, 2018**

These apps can be downloaded via <https://www.google.com/drive/download/>
